Design decisions

Demonstration flow — usability results and time savings have not been measured

01 / Fewer decisions

Cart, delivery and payment are grouped into three stages, with review before submission.

02 / Transparent total

Fees and the full order total are shown before final confirmation.

03 / Clear status

Persistent progress and clear action labels reduce checkout ambiguity.

04 / Accessible defaults

Larger touch areas, readable text and visible selection states.

Deliverables: concept user flow, six screen states, clickable HTML demo, rationale.
